

CAVITE

SOCIO ECONOMIC AND PHYSICAL PROFILE 2012

Provincial Planning and Development Office
Trece Martires City

Foreword

It is with pleasure that the Provincial Planning and Development Office completed its Socio-Economic and Physical Profile (SEPP) for the year 2012.

This SEPP intends to showcase the current status of the province in consideration of different sectors such as local administration, environment, finance, social and economic. It depicts different areas of concerns that serve as indicators in honestly presenting the true picture of Cavite.

The local administration was successful in leading the development of the province. The peace and order was improved, specifically in the area of disaster preparedness. There is continuous increase of industrial and business establishments and the agricultural sector is showing development towards the direction of food sufficiency in the province. Moreover, the social services are also being strengthened in terms of additional hospitals and intensive medical programs.

The provincial government also showed incessant improvement in terms of international competitiveness with the advent of ISO 9001:2008 Certification. Although direct effect is not yet felt by the localities, the more significant impact of the system in terms of service provision to the constituents is very impressive and effective.

In terms of providing necessary statistics for their respective endeavors, may the readers find this Profile worthwhile. May the discussions and data herein be of use among policy makers and the business sector to aid in legislation to further improve the economy of the province and well-being of its people. May the readers also partake on future improvements of this Profile towards enhancement of its usability thru constructive criticisms and suggestions.

The realization of this document is being offered ultimately to the Lord Almighty who is making all of these possible and to each and every Caviteño whom without knowing forms part of this Profile.

Thank you very much.

JESUS I. BARRERA
Provincial Planning and Development Coordinator
