

## Message

---

It is my honor to present the 2020 Cavite Ecological Profile (CEP).

Effective nation-building is possible only when we are equipped with all the relevant information necessary to formulate responsive and adequate plans. It is vital that we are fully aware of the factors affecting socio-economic movements in Cavite so that we can address the root of our problems through suitable programs and projects.

With the CEP, we shall be able to assess the needs of our constituents as well as the resources we have to meet them. It is a crucial tool that will help us achieve our lofty goals for the Province. I am hopeful that with this document, we will continue on our path towards a "Safer Cavite, Better Cavite, Better Philippines."

My appreciation goes to the Provincial Planning and Development Office for diligently putting the CEP together, as well as to all government institutions and stakeholders from the academe and the private sector that provided assistance for the completion of this instrument.

Mabuhay ang Lalawigan ng Cavite!

  
**JUANITO VICTOR C. REMULLA**  
Governor, Province of Cavite
